Colite Canada

About CANIBD

A CSGNA Community of Practice

Our Story

Nurses are an important part of the multidisciplinary approach to managing inflammatory bowel disease (IBD). Approximately 80 GI nurses across Canada have a primary role in IBD care (clinical inpatient and outpatient care, telephone advice, rapid access clinics, transition and biologic support). In 2015, CANIBD was created to advance mentoring and support for IBD nursing in Canada.

Our Vision

To ensure people of all ages living with IBD in Canada receive high quality clinical nursing care within the multidisciplinary team.

Our Mission

CANIBD is committed to improve the quality of care for people living with IBD. To this end, CANIBD:

- Provides support and mentorship for IBD nurses in Canada
- Provides and promotes learning opportunities for nurses
- Provides opportunities for networking and sharing best practices in nursing care
- Develops or adopts nursing guidelines, standards or consensus statement for IBD nursing in Canada
- Elevates the profile of IBD nursing in Canada

Our Success

With continued funding support from industry partners and management support from Crohn's and Colitis Canada, CANIBD has made great strides in moving its mission forward. Some key achievements include:

- CANIBD Community of Practice established with CSGNA
- Successful CANIBD Annual Conference held
- Nurses Travel Education Award launched and awarded
- Nursing-led Research Grant launched and awarded
- Advocacy training support initiated
- Education and patient program supported, including nursing education webinars
- The strategic priorities for 2016/17 are to:
 - Promote and develop IBD nursing care & education
 - Foster greater communication among IBD nursing network
 - Strengthen nursing-led IBD research
 - Support nursing-led advocacy for multidisciplinary teams in IBD care and access to treatments
 - Ensure sustainability of CANIBD nursing community
